SPECIALTY BAGGING - VACUUM SEAL

Unified Flex presents Vertical Form Fill Seal Machine – Vacuum Seal Bagger

Vertical form fill seal machine designed for vacuum packaging in pillow bags. Before the bag is sealed horizontally, vacuum is drawn inside the bag. This allows the product to stay fresh longer. Processing time is much faster than conventional vacuum packaging machines. Much higher efficiency as the product is dropped by gravity from a weigh filler. Savings in costs as bags are formed while they are being packed. It can pack sticks from 3" wide to 10.25" wide. It is ideal for packaging products like dates, meat, poultry, frozen foods and more.

Up to 12 bags/min.

Bag width: 3.0" max.

Bag length: 10.25" max.
